

Art Unit: 2874

provided at a certain angle with respect to said plugging cavities.

9. The optical cable adapter of connector according to claim 6 or 7, wherein each of said plugging cavities comprises a pair of plug locks opposed to each other.

10. The optical cable adapter of connector according to claim 6 or 7, wherein said adapter members or connector members are inserted into an opening provided in said panel to be attached to said panel.

11. The optical cable adapter of connector according to claim 8, wherein said flange section is secured to said panel with bolts so as to attach said adapter members or connector members to said panel.

12. The optical cable adapter of connector according to claim 6, wherein one of said pair of adapter members or connector members comprises at least one jaw section on side thereof and the other of said adapter members or connector members comprises at least one cantilevered adapter lock tab on side thereof at a position corresponding to said jaw section so that said pair of adapter members or connector members are attached to a periphery of said panel.

13. An attaching member for attaching an optical cable adapter or connector to a panel, said attaching member provided separately from adapter members of said adapter or connector members of said connector and comprising:

a panel abutment member provided along said panel; and
